Add a New Course to a Program

The program should be imported and the proposal launched before making any changes.

Go to the bottom of the course listing, click Add Course

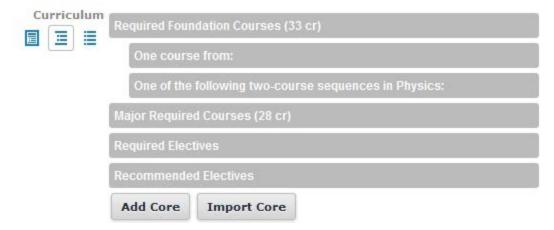

Enter the Prefix, Code (Course Number), and Name (Title) of the course you would like to add.

Click Add Course. Repeat this for any additional courses that will be added to any part of this program.

Scroll back up to the top of the course listing and click on the middle icon (View Curriculum Schema) under Curriculum.

Click on the core where you would like the course added. This will expand the core.

Click Add Courses, and select the courses from the list to be added to that core. The courses may be reordered by clicking on the course and dragging it to the correct location in the list.
